

OVERVIEW

This year's B.E.S.T. conference will focus on the quest for a personalized approach in bariatric and metabolic surgery. From indications to outcomes, we will be defining the role for primary, revisional procedures, and emerging technologies. The specialty of bariatric surgery is increasingly challenging, both in the area of expertise and in managing outcomes and complications. Additionally, obesity as a chronic disease provides many areas of both advancement and discussion.

TARGET AUDIENCE

Physicians, nurses, trainees and allied health clinicians involved in the treatment of obesity and metabolic disease.

OBJECTIVES

By attending this activity, participants will be able to:

- Define an algorithm for the management of GERD after sleeve gastrectomy and the preoperative evaluation for patients with potential risk for post-op GERD
- Review and determine the anatomy and physiology of the small bowel and its implications regarding bariatric surgery
- Explain how to evaluate patients with recidivism, and identify select steps for revisional surgery indications and strategies
- Identify the appropriate applications of robotic, computer-assisted technology in bariatric surgery
- Define and clarify the current state of knowledge regarding single anastomosis procedures
- Identify strategies for the high-risk patient
- Identify appropriate indications for bariatric endoscopic interventions

ACCREDITATION

In support of improving patient care, Ciné-Med is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

PHYSICIANS

Ciné-Med designates this live activity for a maximum of 13.75 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NURSES

This activity provides 13.75 contact hours for nurses.
