

# THE TROJAN HORSE: Differential Diagnoses for the Obstructed Jejunojejunostomy after a Roux en Y Gastric Bypass

Dr Alexandra MacKenzie<sup>1</sup>, Dr Caitlin Meechan<sup>1</sup>, Dr Madeline Turner<sup>1</sup>, Mr Swathikan Chidambaram<sup>1</sup>, Mr Derek Yeung<sup>1</sup>, Mr Naim Fakh-Gomez<sup>1</sup>  
Chelsea and Westminster Hospital NHS Trust  
London

- Small bowel obstruction after a RYGB can be challenging to manage and cannot be managed conservatively
- Internal hernia is often the expected cause, however other rarer differential diagnosis must be considered.
- The operative management may require reconstructing the RYGB and should be managed by surgeons who have bariatric surgery experience if possible
