[x] I have no potential conflict of interest to report

Duodenal Transection

- BPD-DS
- SADI-S
- Sleeve + DJB

Factors affect integrity of anastomosis

- **Blood perfusion**
- Tension on the anastomosis

Patient Presentation

Patient: 45-year-old female

Anthropometrics: 156.7 cm / 73.8 kg / 30.06 kg/m2

Past medical history:

Type 2 diabetes (diagnosed 8 years ago, on insulin therapy)

Dyslipidemia

EGD: Chronic superficial gastritis

[%]TWL %total weight loss, BMI body mass index, FBG fasting blood glucose

- Anastomotic leakage
 - 8th patient
 - Converted to RYGB

- Procedural change
 - Methods for anastomosis
 Hand-sewn → Linear stapled (from the 43rd case)
 - Infra-pyloric vessels
 Partially transected → Preserved

Factors affect integrity of anastomosis

- **Blood perfusion**
- Tension on the anastomosis
