University of Barcelona. Spain

## CONFLICT OF INTEREST DISCLOSURE

In accordance with «EACCME criteria for the Accreditation of Live Educational Events»:

**I have the following potential conflict(s) of interest to report:**

- Speaker/ Consultant for Abex® SPAIN, Smith & Nephew, Johnson & Johnson (Ethicon) SPAIN, BBraun Spain
- Director of the iVascular Surgical Research Chair
- The present work has been funded by a state grant for Health Research Projects of the Acción Estratégica en Salud 2013-2016 (Instituto de Salud Carlos III, Spain), awarded in the 2017 call (FIS PI17-01879)

CASE MIX DISCLOSURE

- RYGB
- SG
- OAGB
- DS/SADI-S
- REVISIONAL
- ENDOSCOPIC

**SINCE 2018:  
25% FULLY ROBOTIC  
30% ROBOTIC ASSISTED  
45% LAPAROSCOPIC**

## RELATIONSHIP BETWEEN GENE EXPRESSION AND 12m METABOLIC OUTCOME

# CONCLUSIONS

Overall, our findings show a relationship between the overexpression of some ECM-related genes in visceral tissues of obese patients and altered glucose metabolism.

An aerial photograph of a coastal city at dusk. The foreground features a large, well-lit marina filled with numerous sailboats and yachts. A long stone pier extends from the marina into the sea. The city's lights are beginning to glow, and the sky is a mix of blue and orange. In the background, there are rolling hills and mountains under a cloudy sky.

THANK YOU VERY MUCH
