Let me tell you a story...

Jan 2011 in Sao Paulo, Brazil

“perfect” gastric plication

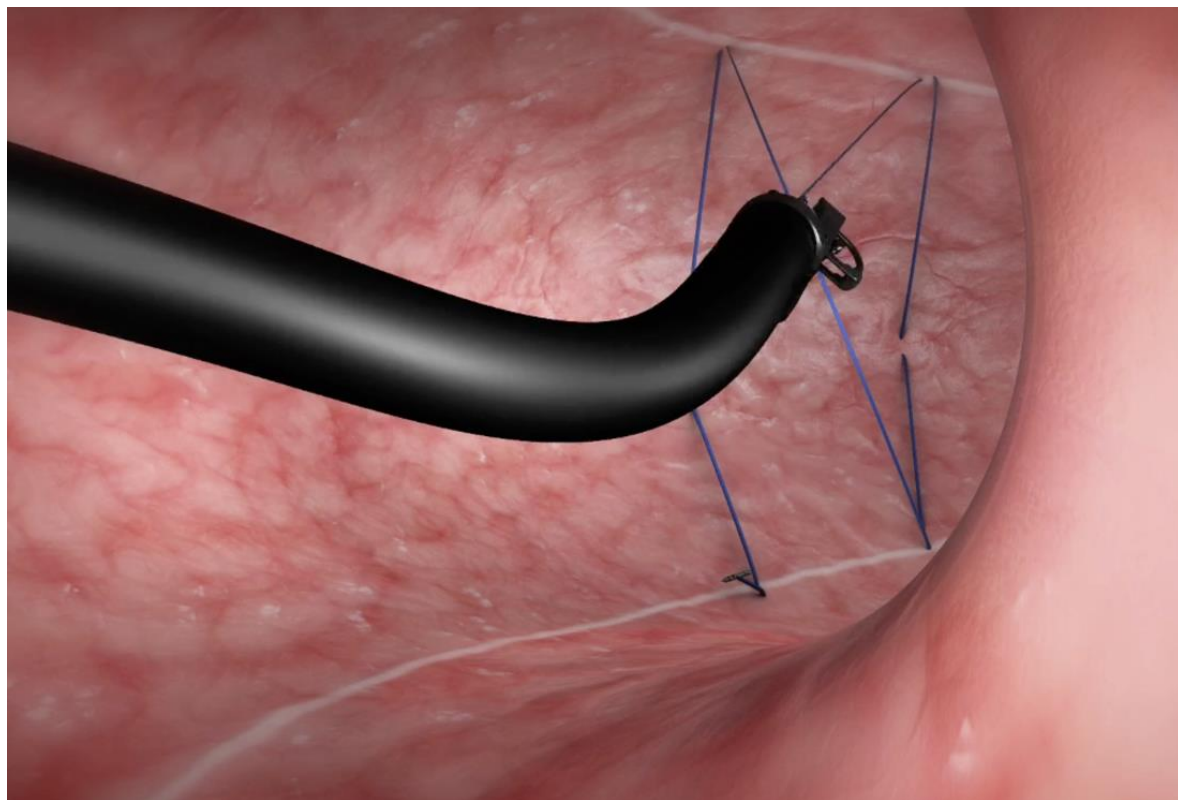

Lectured by the best bariatric endoscopist

Gastric Plication in 2024

- Inconsistency on efficacy and durability
- Not a complication-free procedure (gastric herniation, necrosis, leaks, etc.)
- Not endorsed by ASMBS or IFSO
- Pretty much...has disappeared

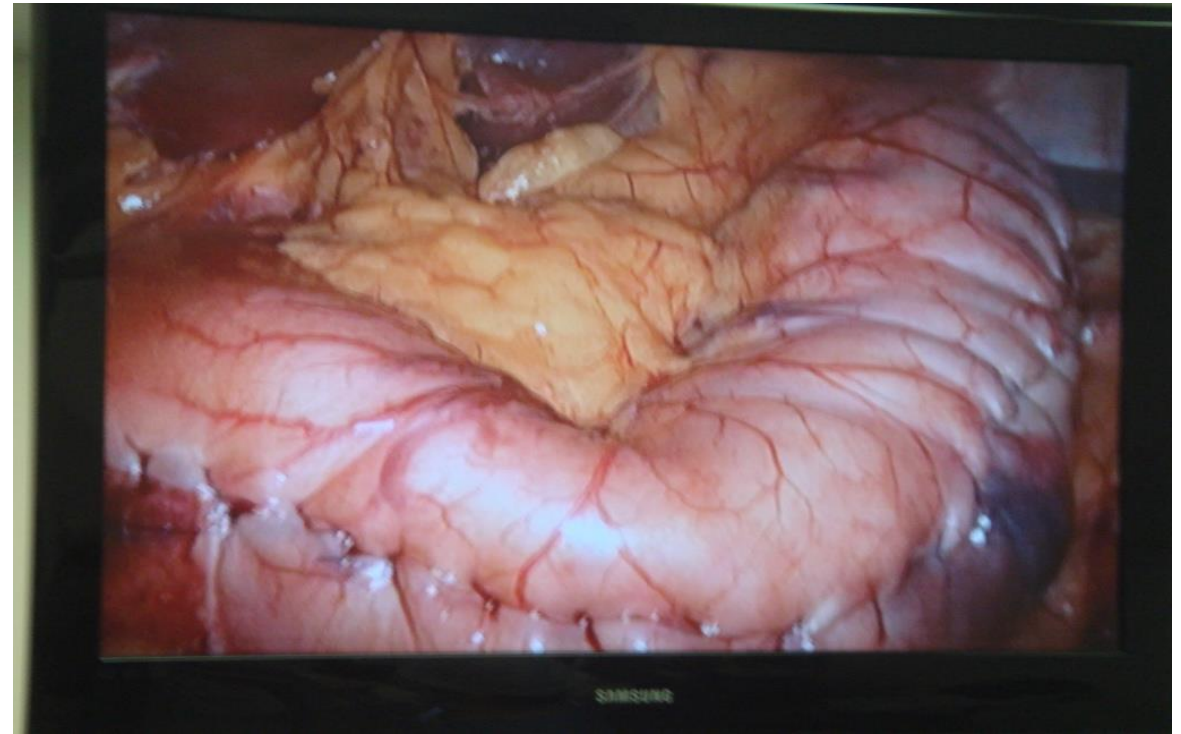

What about a plication done endoscopically?

How does it look?

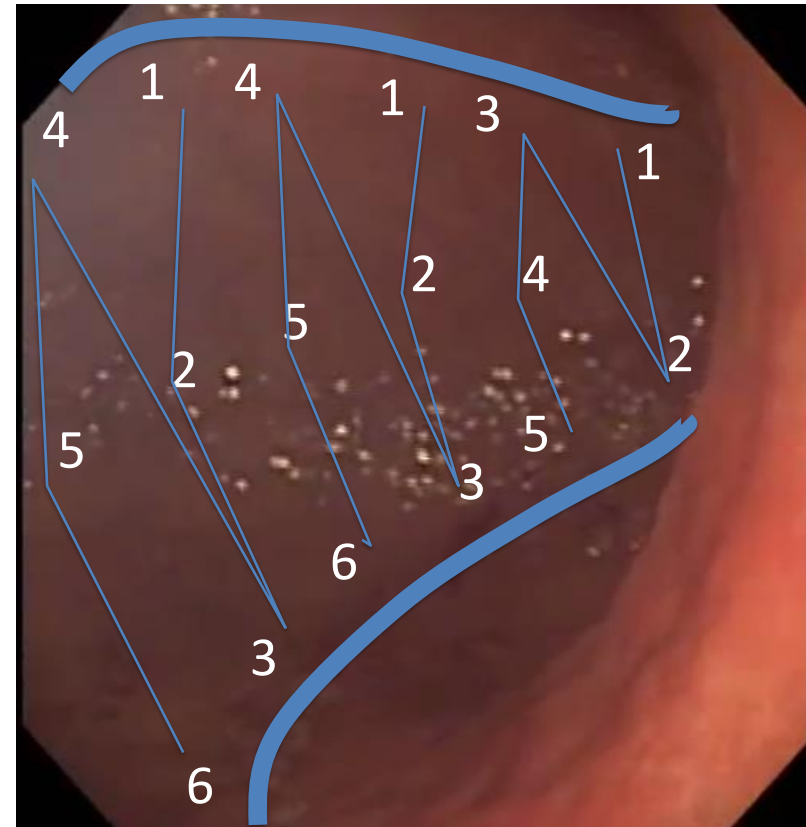

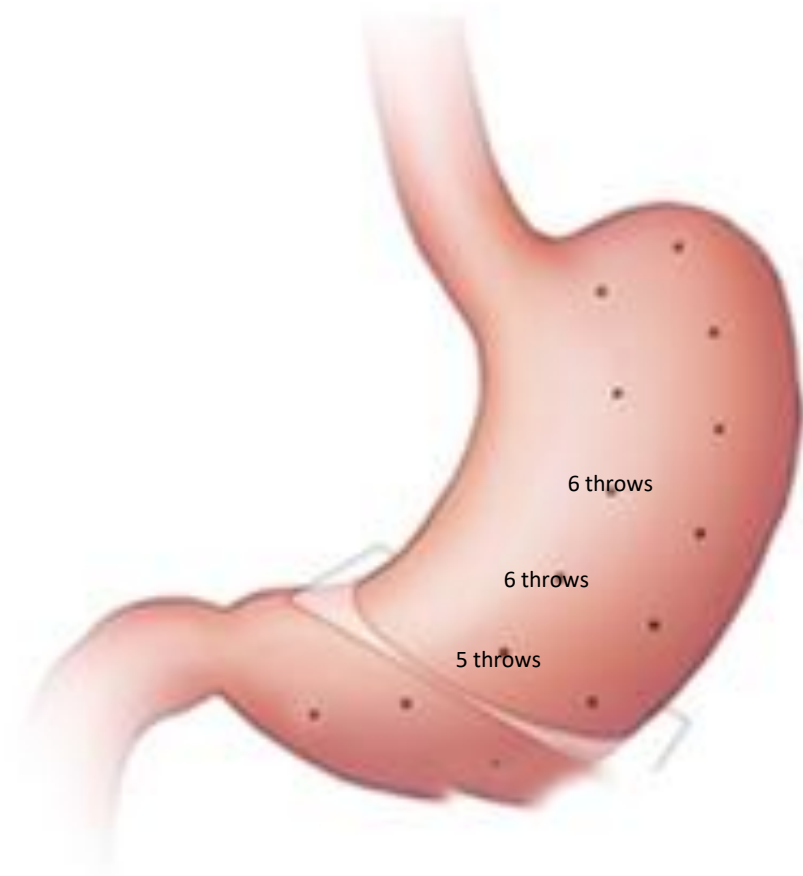

ESG

LGP

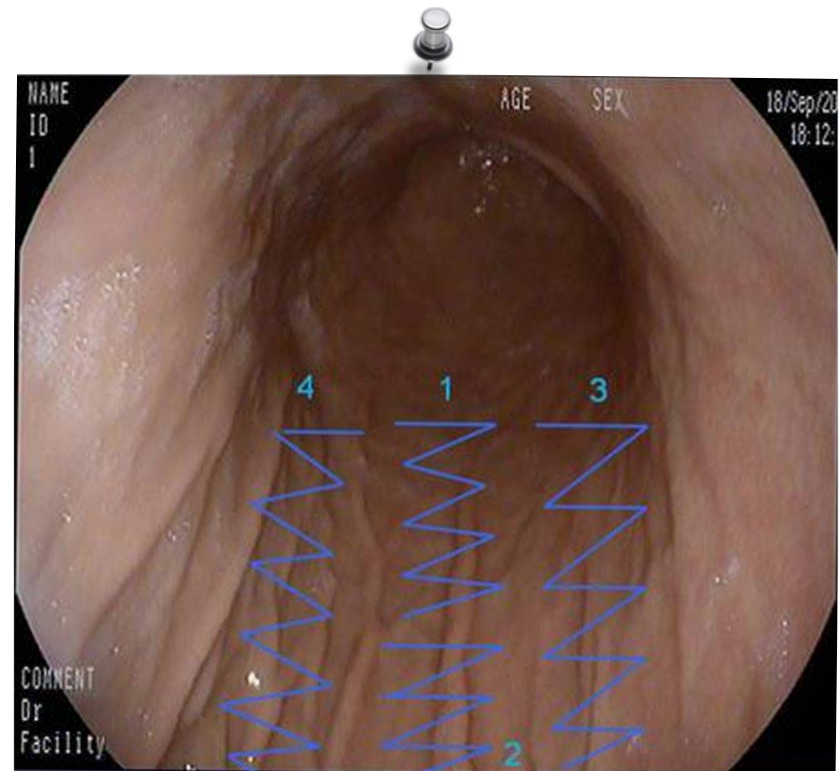

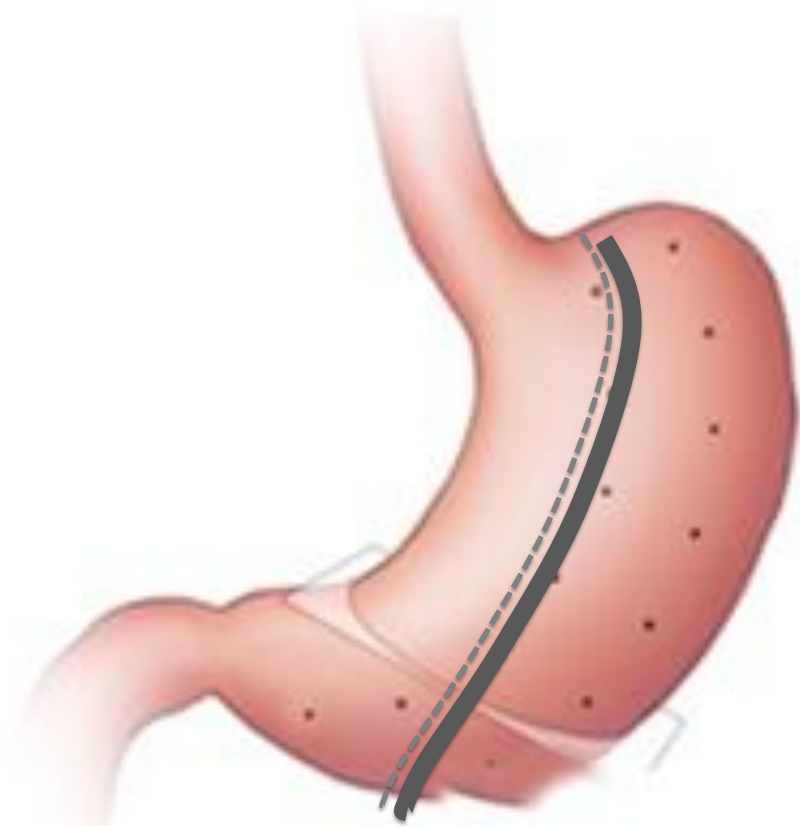

Inconsistency in technique

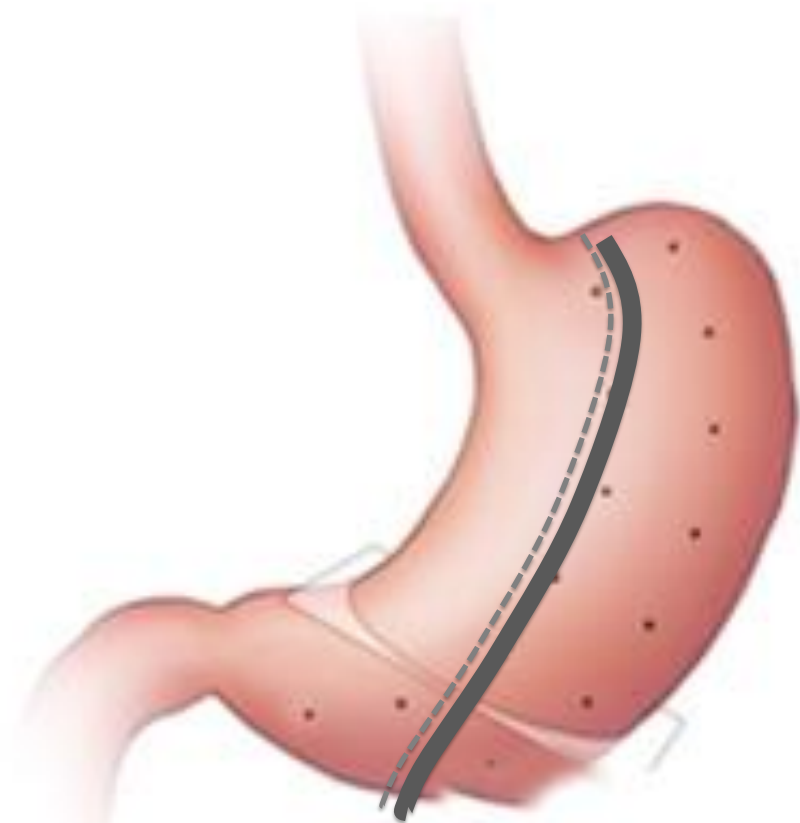

PANAMA - FIH SERIES - SHARAYA

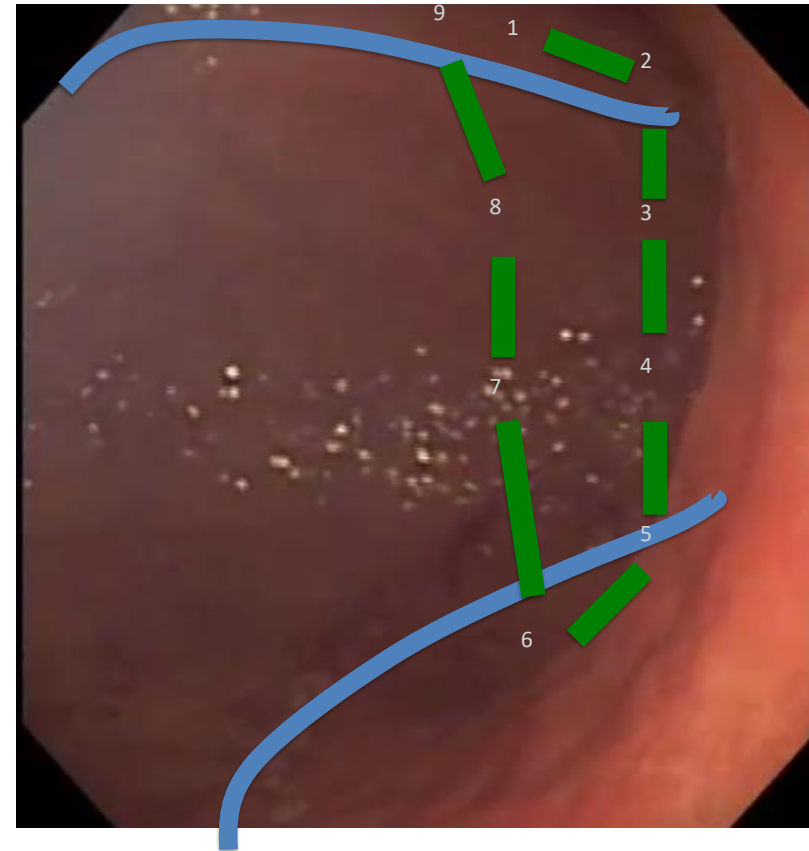

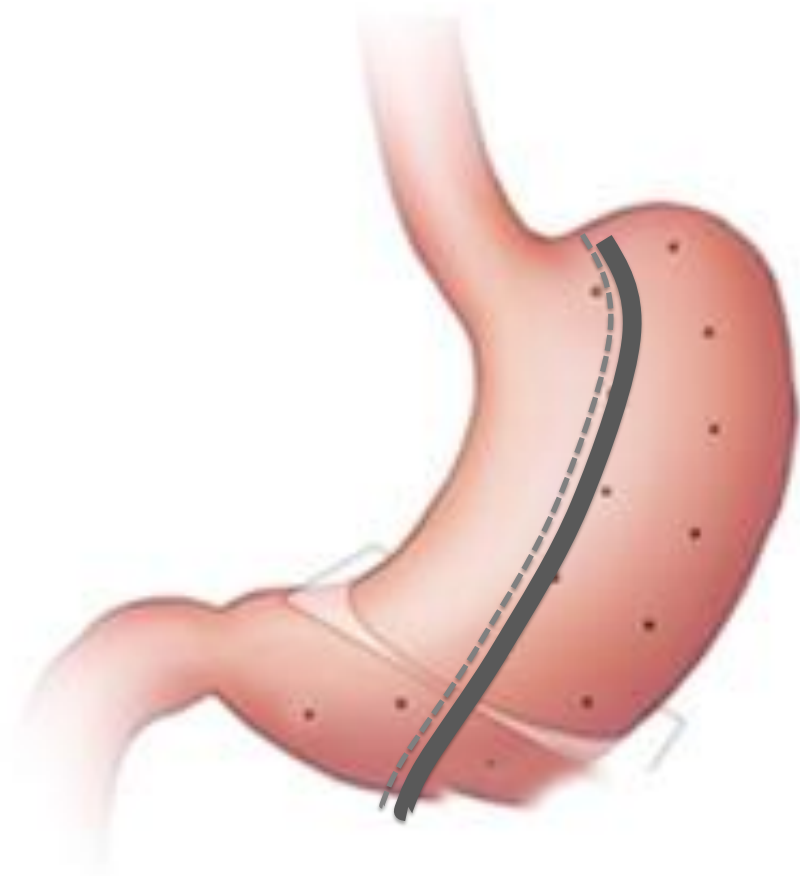

SPANISH - CLINICAL SERIES - LOPEZ-NAVA

SPANISH - CLINICAL SERIES - GRAUS

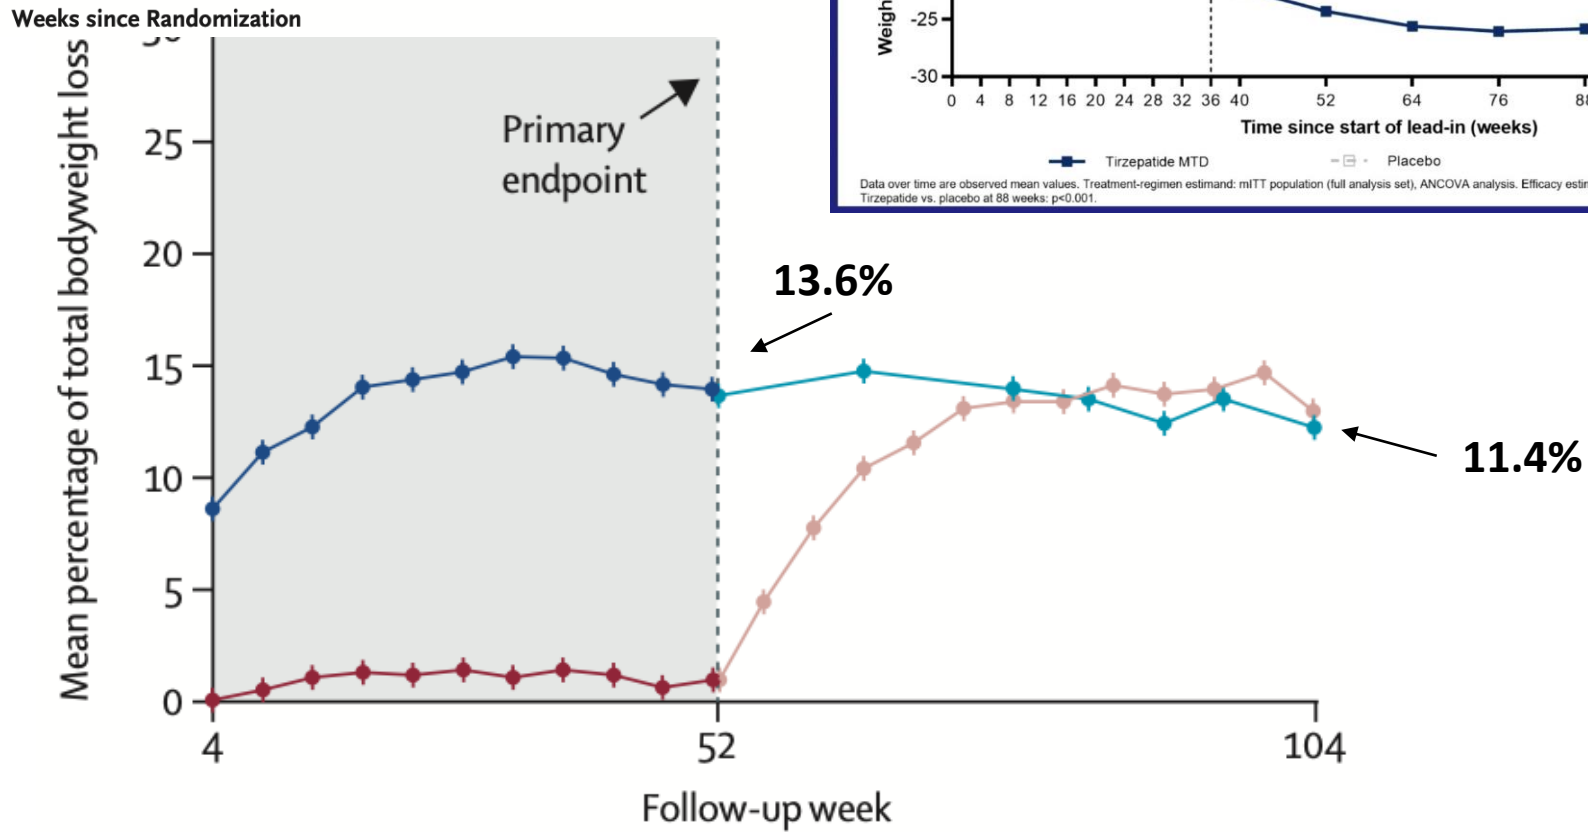

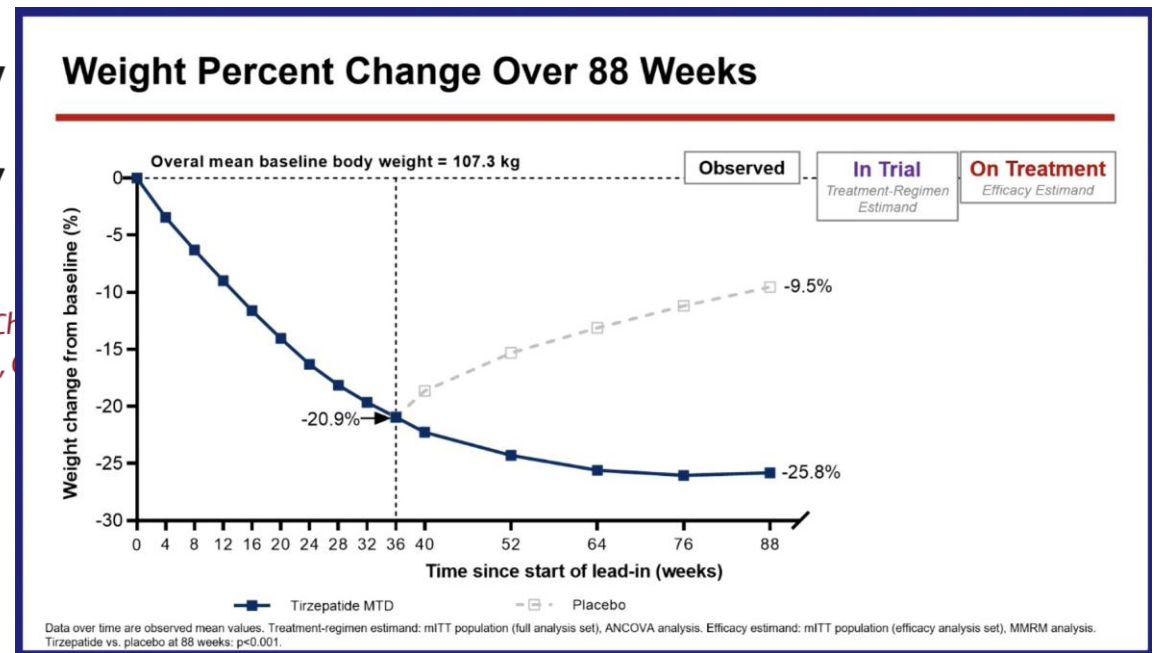

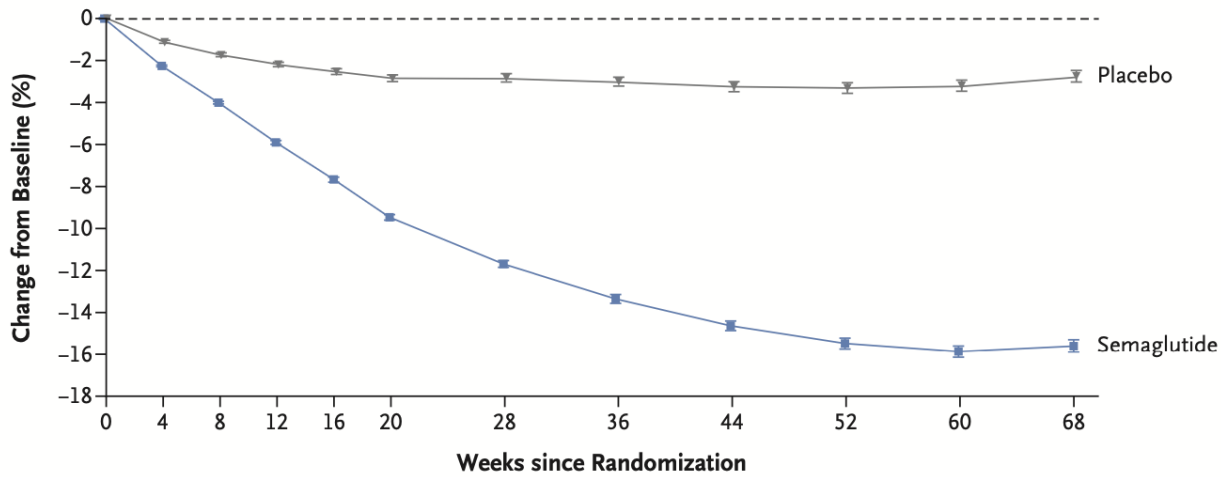

BRAZIL - CLINICAL SERIES - GALVAO NETO / LOPEZ-NAVA

+ REINFORCMENT

USA - BRAZIL - CLINICAL SERIES - ABU DAYYAEH / GALVAO NETO

Results: Safety

3 SAE Grade III Clavien-Dindo, **No Grade IV or V**
Safety Population: All ESG completers (n=150)

Rate 2 %

All Recovered

6 patients **(4%)** hospitalized for conservative management of accommodative symptoms

ESG in 2024

- Inconsistency on technique, efficacy and durability
- Not a complication-free procedure (abscess, bleeding, malnutrition, etc.)
- Not endorsed by ASMBS or IFSO
- Expensive and GLP1s WL curves are better
- Pretty much (similar to LGP)...will disappear!

Thank you!
